# ROOF COATING SYSTEMS

## Give Your RV Roof a Fresh Start.

Bring new life to your RV roof with Dicor's Coating Systems — designed to restore a clean, bright appearance while adding a layer of lasting protection. It's a simple way to renew your roof and extend its life for the journeys ahead.

## FOR EPDM & PVC ROOFS

### STANDARD ACRYLIC ROOF COATING

Dicor's Standard Acrylic roof coating is an excellent protective barrier that provides superior weatherability and UV resistance. Use with Dicor Rubber Roof Cleaner/Activator for proper adhesion.

### COOLCOAT ACRYLIC ROOF COATING

CoolCoat Acrylic Coating features ceramic microcells that reduce interior heat transfer by up to 29% — helping RVs stay cooler while easing A/C demand. It reflects and dissipates solar heat and should be used with Dicor Rubber Roof Cleaner/Activator for proper adhesion.

## FOR TPO ROOFS

### SIGNATURE SILICONE ROOF COATING

Signature is a 100% silicone coating that stays permanently flexible and resists UV rays and extreme temperatures. It dries to the touch in 1 hour and is walkable in 2. For best results, use with Dicor Rubber Roof Cleaner/Activator on EPDM roofs and TPO RV Roof Primer on TPO roofs.

Formulated with 100% acrylic elastomeric resins, it creates a flexible, rubber-like barrier that expands and contracts with roof movement. The Arctic White finish delivers high reflectivity to help lower interior temperatures and enhance appearance.
